INVESTMENT OBJECTIVE

The investment objective of the DFA Commodity Strategy Portfolio is to seek total return consisting of capital appreciation and current income.

PRINCIPAL RISKS

Risks include loss of principal and fluctuating value. Investments in commodities are subject to risks associated with changes in the weather, regulatory developments, and political and economic instability. Investments concentrated in a smaller number of issuers and sectors are subject to greater volatility than more diversified investments. The use of derivatives may be considered more speculative than other types of investments. Fixed income securities are subject to increased loss of principal during periods of rising interest rates and may be subject to various other risks including changes in credit quality, liquidity, prepayments, and other factors. Sector-specific investments can increase these risks. For more detail regarding the risks affecting this Portfolio, please see the Principal Risks section of the prospectus.

ANNUALIZED PERFORMANCE (%)

Performance for the portfolio is reported net of all advisory fees and includes reinvestment of dividends and other earnings. Performance less than one year is not annualized. Performance data shown represents past performance and is no guarantee of future results. Current performance may be higher or lower than the performance shown. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.
