INVESTMENT OBJECTIVE

The investment objective of the DFA VA Global Moderate Allocation Portfolio is to seek total return consisting of capital appreciation and current income. The DFA VA Global Moderate Allocation Portfolio is a "fund of funds," which means that the Portfolio uses its assets to purchase other mutual funds managed by Dimensional Fund Advisors LP. The portfolio is available only to insurance company separate accounts funding variable life and variable annuity insurance contracts.

PRINCIPAL RISKS

Risks include loss of principal and fluctuating value. Small cap securities are subject to greater volatility than those in other asset categories. International investing involves special risks such as currency fluctuation and political instability. Investing in emerging markets may accentuate these risks. Fixed income securities are subject to increased loss of principal during periods of rising interest rates and may be subject to various other risks including changes in credit quality, liquidity, prepayments, and other factors. Sector-specific investments can also increase investment risks. For more detail regarding the risks affecting this Portfolio, please see the Principal Risks section of the prospectus.

ANNUALIZED PERFORMANCE (%)

Performance for the portfolio is reported net of all advisory fees and includes reinvestment of dividends and other earnings. Performance less than one year is not annualized. Performance data shown represents past performance and is no guarantee of future results. Current performance may be higher or lower than the performance shown. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.
