INVESTMENT OBJECTIVE

The investment objective of the DFA LTIP Portfolio is to seek to provide total return consistent with inflation protected long-term instruments. Total return is comprised of income and capital appreciation.

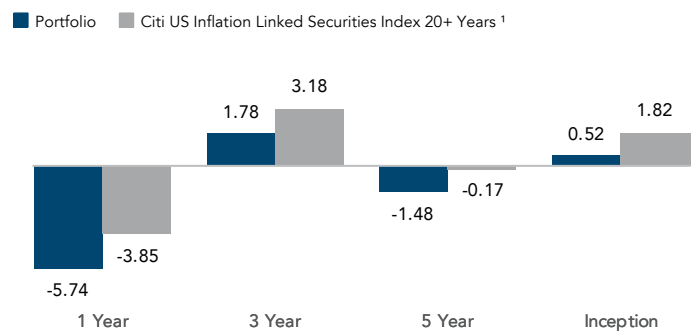

PRINCIPAL RISKS

Risks include loss of principal and fluctuating value. Fixed income securities are subject to increased loss of principal during periods of rising interest rates and may be subject to various other risks including changes in credit quality, liquidity, prepayments, and other factors. Inflation-protected securities may react differently from other debt securities to changes in interest rates. International investing involves special risks such as currency fluctuation and political instability. Sector-specific investments can increase these risks. For more detail regarding the risks affecting this Portfolio, please see the Principal Risks section of the prospectus.
