## INVESTMENT OBJECTIVE

The investment objective of the DFA Selectively Hedged Global Fixed Income Portfolio is to maximize total returns within the universe of domestic and foreign debt securities that the Portfolio invests. Total return is comprised of income and capital appreciation.

## PRINCIPAL RISKS

Risks include loss of principal and fluctuating value. Fixed income securities are subject to increased loss of principal during periods of rising interest rates and may be subject to various other risks including changes in credit quality, liquidity, prepayments, and other factors. International investing involves special risks such as currency fluctuation and political instability. Investing in emerging markets may accentuate these risks. The Portfolio may enter into forward currency contracts to attempt to protect against uncertainty in the level of future foreign currency rates, to hedge against fluctuation in currency exchange rates or transfer balances from one currency to another. For more detail regarding the risks affecting this Portfolio, please see the Principal Risks section of the prospectus.
